

Communication Security Issues

Typical Cybersecurity Threat Faced by Organizations

In today's computerized world, cybersecurity threats are on the rise and in need of attention for organizations. One of the most common cyber threats faced by organizations is **PHISHING**.

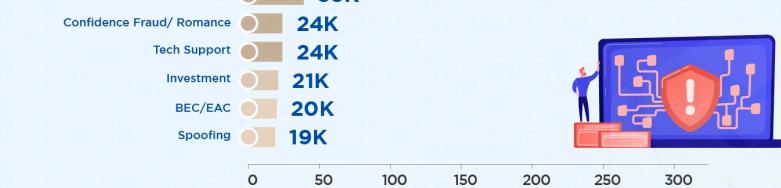

What is Phishing?

Phishing is a form of social engineering to trick users into divulging sensitive information.

How dangerous is it?

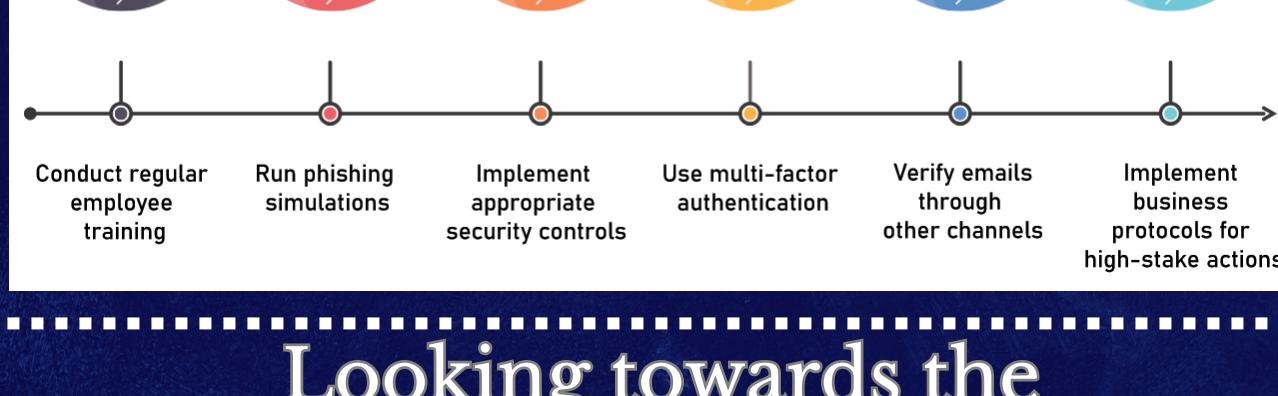

I Cybercrimes with most victims 2021

How Does Phishing Threatens Organizations?

Organizations can be caught up in a mass campaign (emails sent indiscriminately to millions of inboxes). The attacker uses information of employees or company obtained from malicious links to make their messages even more persuasive and realistic.

How to Prevent Phishing Attacks as an Organization

Looking towards the future

All organizations and individuals should be aware of cyber threats such as phishing scam and protect themselves against these online threats driven by malicious intents.
